

FREE TERMITE INSPECTION: MAKE THE RIGHT CHOICE

When we find evidence of termites on an inspection and whether that evidence points to old damage or active infestation, **we report it**. However, this does not mean we perform termite inspections per Georgia State law.

Some home inspectors advertise a “free termite inspection”, but **almost all licensed pest control companies will do a termite inspection at no charge**. If you need a Termite Letter which is a legal document there may be a nominal charge for this service.

Using a licensed pest control company to perform your termite inspection is the far better option for you, for the simple reason that they can also offer you the treatment and prevention services, re-treatment bonds, and repair bonds you will need to protect your home now and in the future. Below are some pest control companies you may want to contact to do your termite inspection. Your real estate agent can also recommend some pest control companies.

Avondale Pest Control

Mark Medlin
770-560-6072
